

Tables, Graphs, Maps - the new interactive user interface to Eurostat data

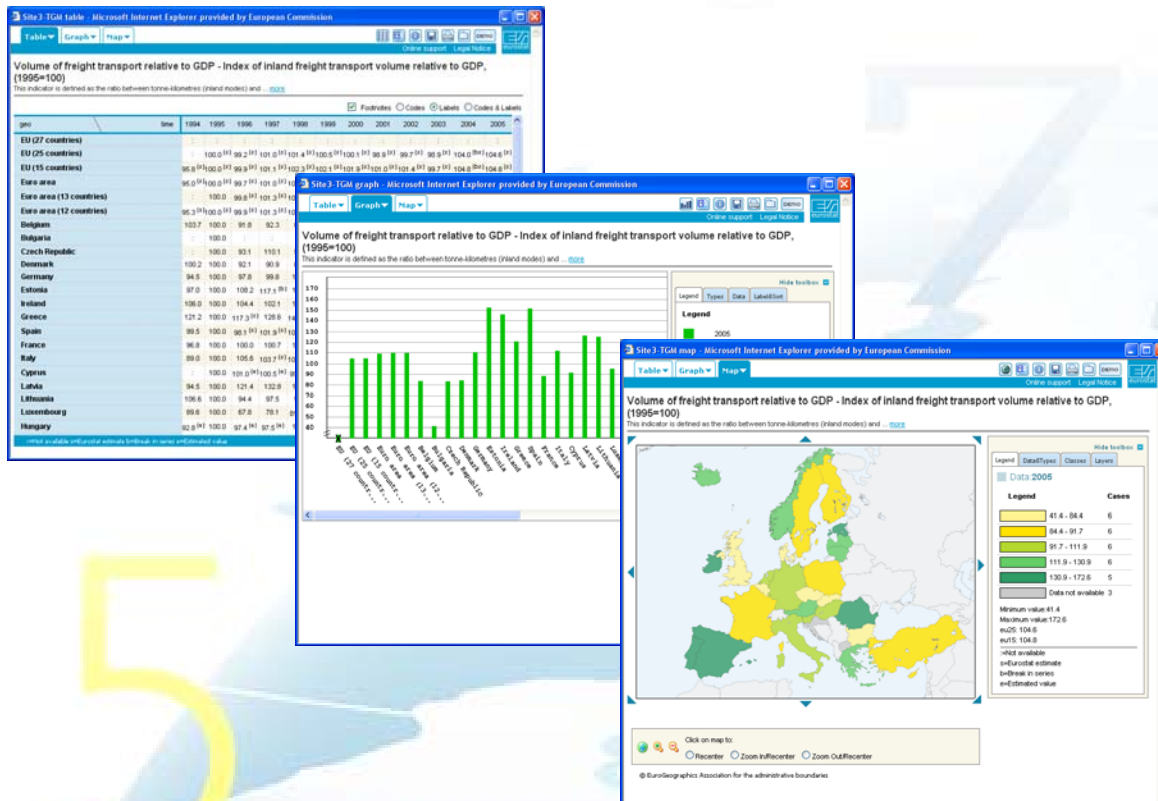

Nordic Forum for Geostatistics

Helsinki

Ekkehard Petri

Tables, Graphs, Maps - the new interactive user interface to Eurostat data

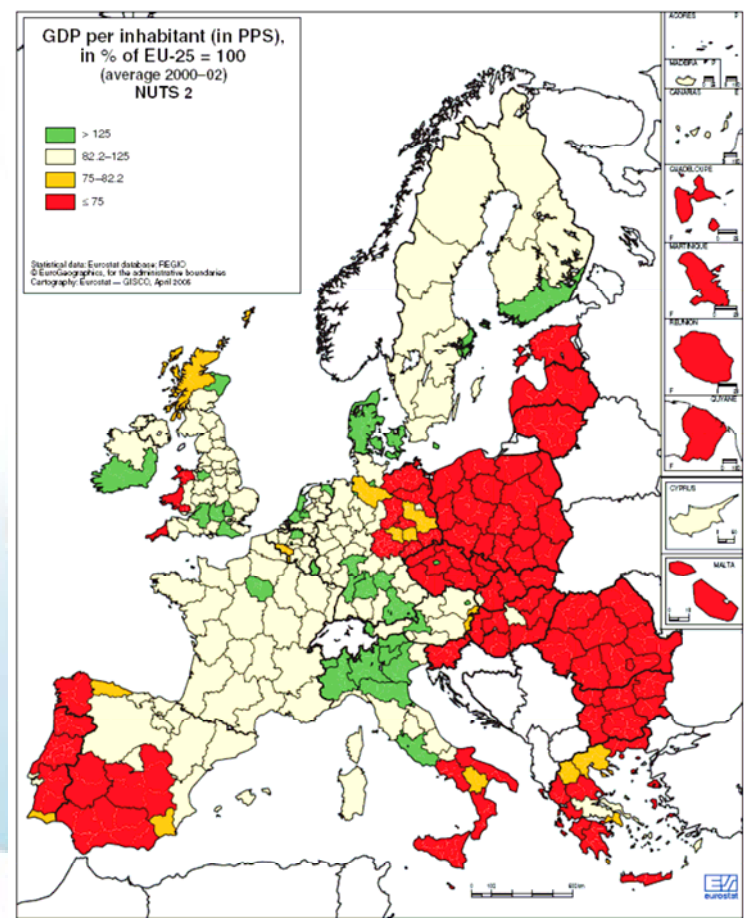

Content covered

- Background and Objectives of the project
- Technical Background
- Live demonstration

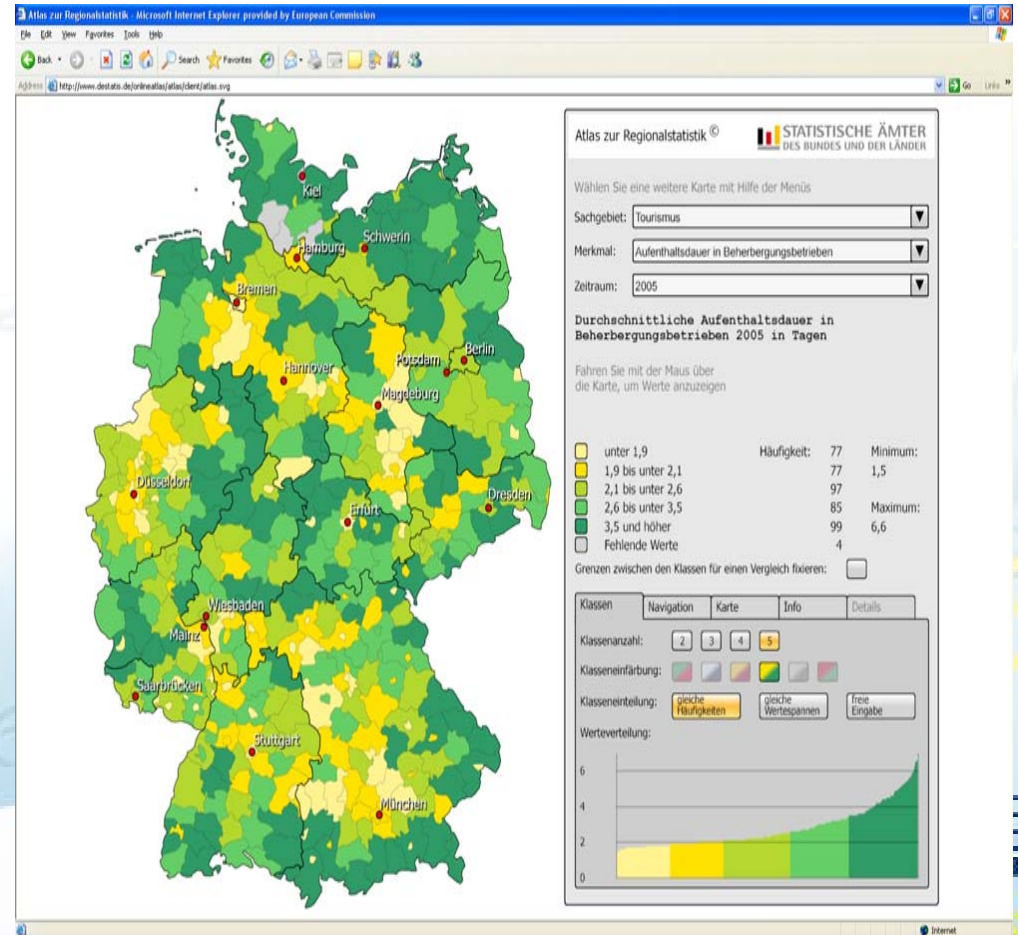

Goals of the TGM Project

- Share, what we have anyway

Goals of the TGM Project

- Catch up with the member states

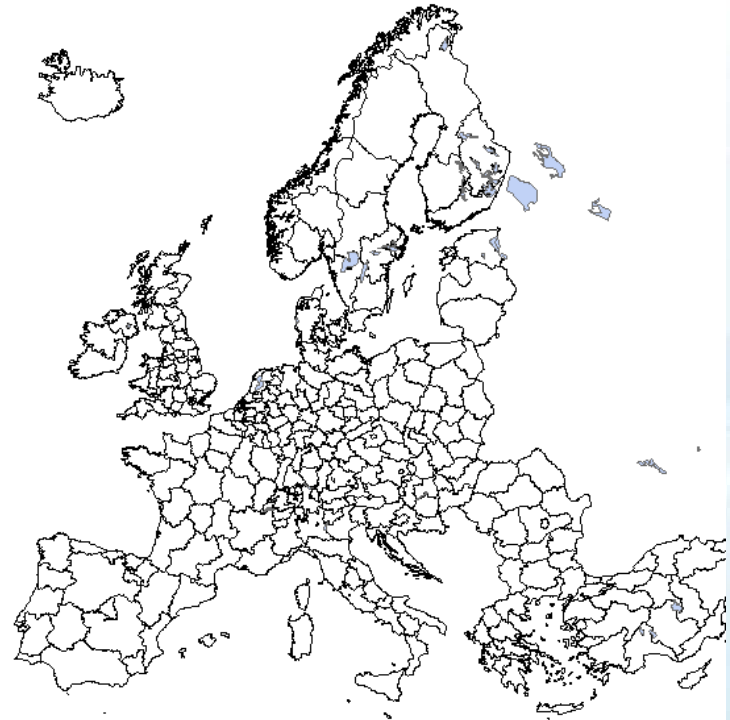

Condition 1: Lever, what we have

- ... and XML files of these predefined data tables ...

```
<?xml version="1.0" encoding="utf-8" ?>
- <Data>
- <Table>
- <Grid>
- <AxisZ name="unit">
- <Position value="i2005">
- <AttList>
- <Att name="order">1</Att>
- </AttList>
- </AxisZ>
- <AxisY name="geo">
- <Position value="ea">
- <AttList>
- <Att name="order">1</Att>
- </AttList>
- </AxisY>
- <AxisX name="time">
- <Position value="2006m09">
- <AttList>
- <Att name="order">12</Att>
- </AttList>
- <Cell value="102.52" />
- </Position>
- <Position value="2006m10">
- <AttList>
- <Att name="order">11</Att>
- </AttList>
- <Cell value="102.60" />
- </Position>
- <Position value="2006m11">
- <AttList>
- <Att name="order">10</Att>
- </AttList>
- <Cell value="102.64" />
- </Position>
- <Position value="2006m12">
- <AttList>
- <Att name="order">9</Att>
- </AttList>
- <Cell value="103.04" />
- </Position>
- <Position value="2007m01">
- <AttList>
- <Att name="order">8</Att>
- </AttList>
- <Cell value="102.51" />
- </Position>
- <Position value="2007m02">
- <AttList>
- <Att name="order">7</Att>
- </AttList>
- <Cell value="102.81" />
- </Position>
- <Position value="2007m03">
- <AttList>
- <Att name="order">6</Att>
- </AttList>
- <Cell value="103.50" />
- </Position>
- <Position value="2007m04">
- <AttList>
```

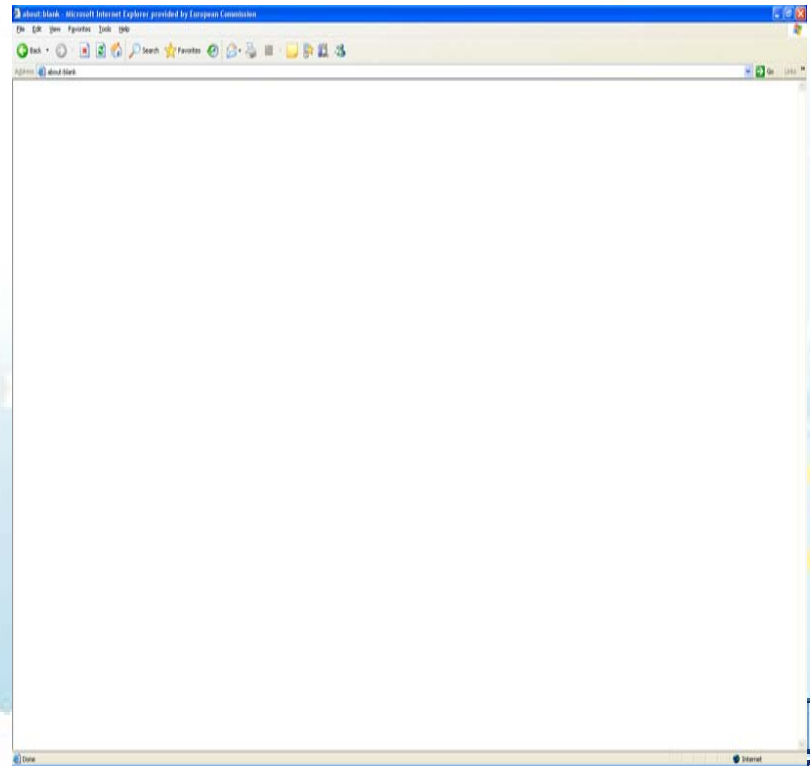

Condition 1: Lever, what we have

- ... and GISCO Data

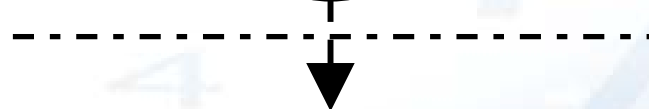

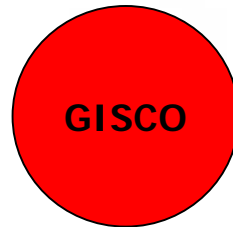

Condition 1: Lever, what we have

- ... and a Web browser

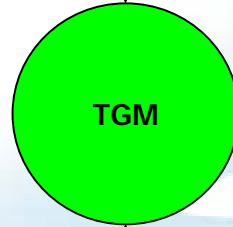

Condition 2: Do not touch anything that runs

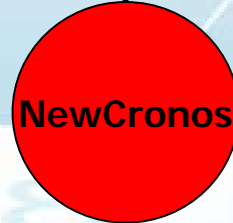

Unit D2

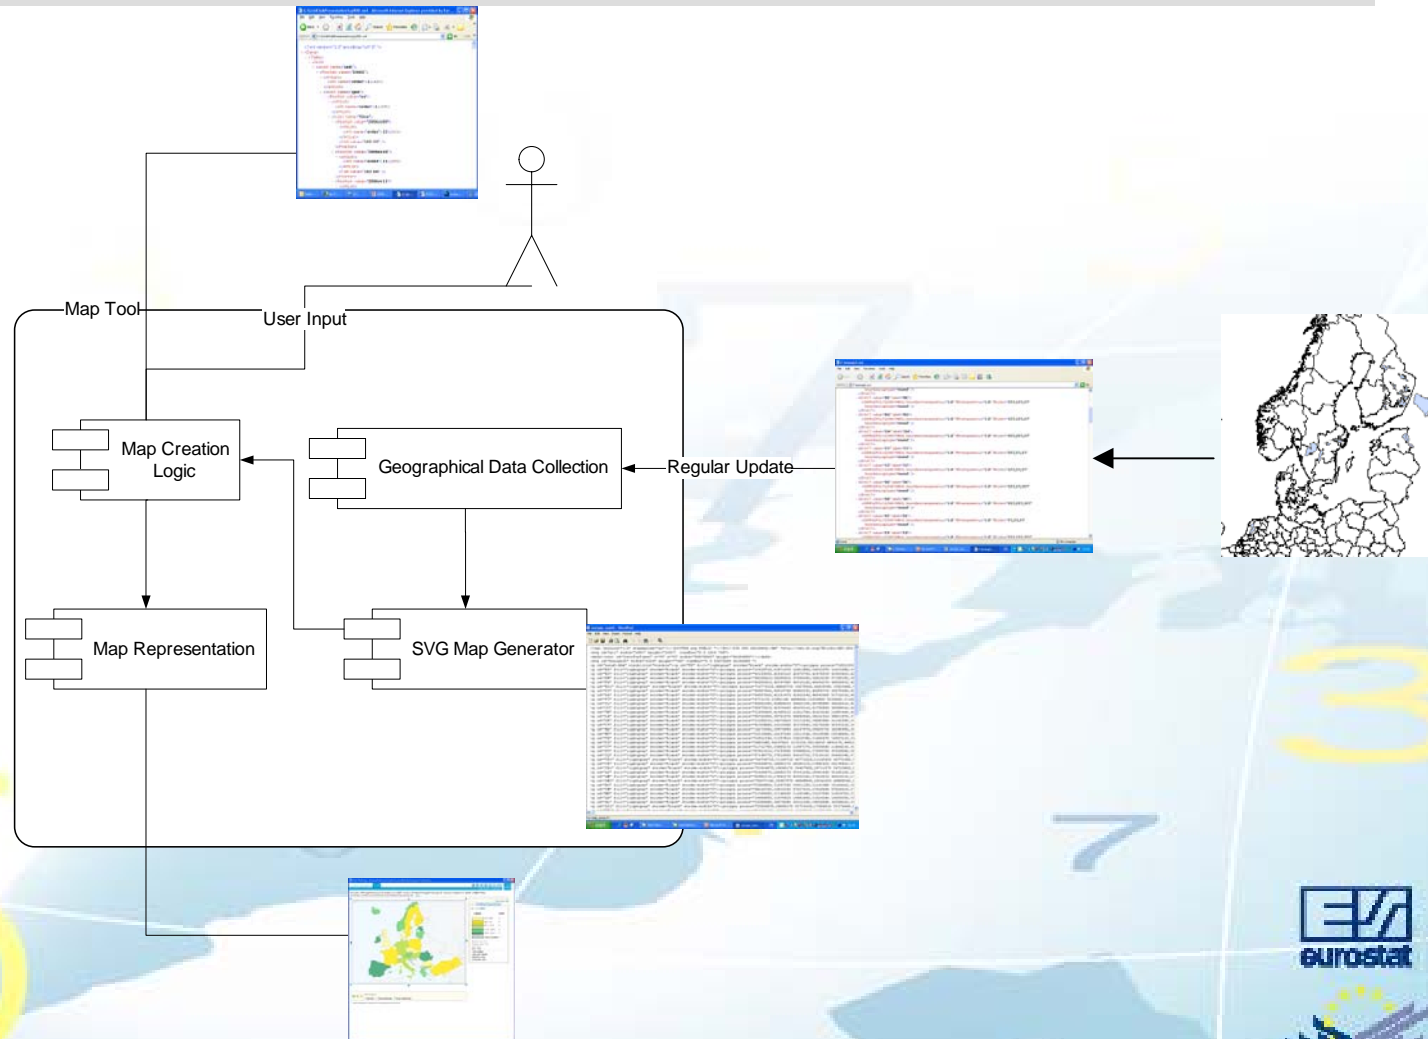

Unit B6

Unit B4

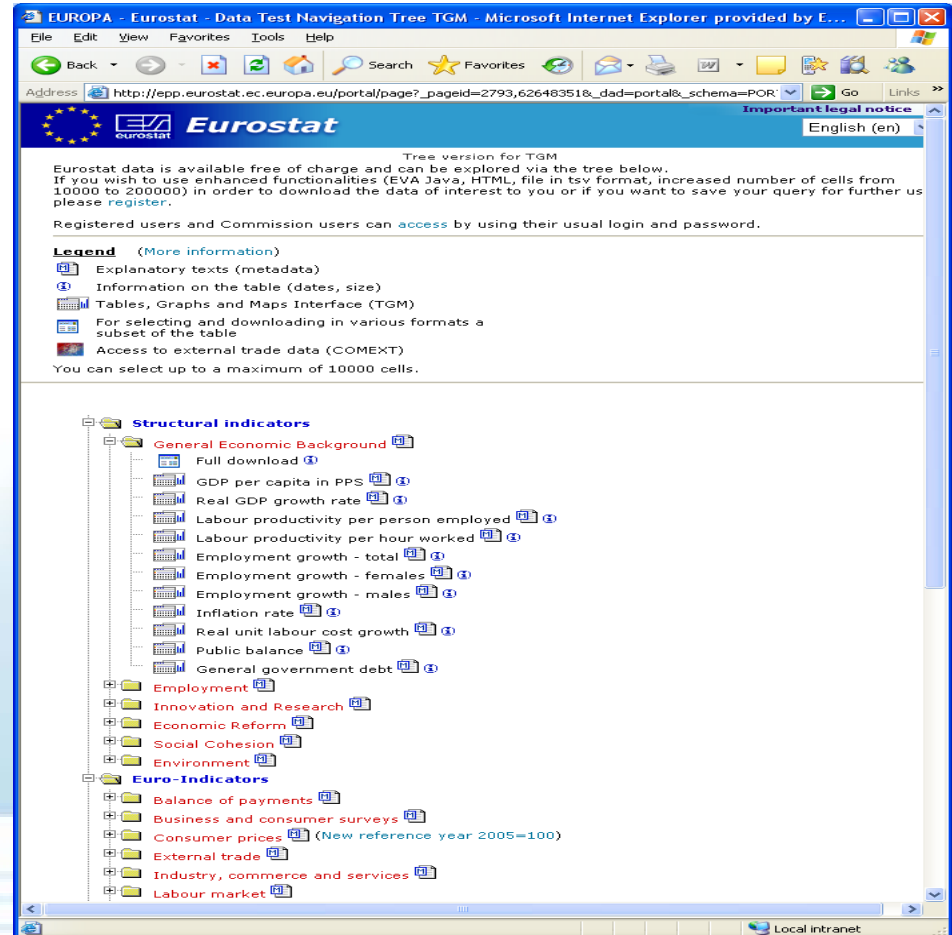

Use what we have and do not touch anything – the Architecture

What is in there?

- Ca. 1300 predefined tables
- Indicators on a great variety of statistical domains
- Almost all data can be integrated

Summary

- A fast and cost effective solution
- Modular architecture with clear, defined interfaces to existing services
- TGM based to a maximum on open standards and free software
- Great deal of data, free of charge
- Webbased
- Appealing maps with essential GIS functions

Outlook

TGM, Helsinki, 21 September 2007
