

EFGS 2020 Webinar 20-21.10.2020 - Day 2- issues discussed on chat

General Assembly

Niek van Leeuwen

Why is this Google overview not presented in a dot map?

Amelia Wardzińska-Sharifat such a small size choropleth map form seems to be easier to read)

Pasi Piela

Nice that Trusted Smart Statistics concept has been taken into account (smile) This is strongly being pushed forward by Eurostat. Within the European Statistical System it should involve common data platforms for certain trusted statistics in the future. E.g. web intelligence data hub, or even mobile network data hub etc. (Its taskforce has a meeting tomorrow.)

AT_NSI_Ingrid Kaminger & colleagues

Concerning strategy map and actors map: How can we incorporate all different providers of geodata **other than** NSIs or Mapping agencies into the integration process? Do they know they play such an important role to us?

Jerker Moström

The community has grown but the "old core group"/Steering committee has shrunk (due to retirements etc). So we need to revitalise the core group with new blood!

POELMAN Hugo (REGIO)

@Ingrid: excellent remark: trying to discuss relationships with "other" providers in a thematic way might be interesting: for instance specifically on mobility, education, health, etc.

Stephan Arnold (Destatis)
