

EFGS STANDARD FOR OFFICIAL GRID STATISTICS, POPULATION VARIABLES V.1.0

The following statistical units, variables and divisions are recommended as official statistics; free of charge and without disclosure to be reported on km² grid cells.

If disclosure is still considered to be needed, the recommended threshold value is set to 10.

2.1 USUALLY RESIDENTIAL POPULATION

The residential population data variables below refer to the definition of 'usual residence' given in Article 2(d) of Regulation (EC) No 763/2008.

2.1.1 USUALLY RESIDENTIAL POPULATION, TOTAL

Refers to aggregated integer value over total of residential population per grid cell.

Population	
TOT_P	[Population, total]

2.1.2 USUALLY RESIDENTIAL POPULATION BY SEX, TOTAL

Refers to aggregated integer value over total of residential population divided by sex per grid cell.

Population	
TOT_F	[Population, female, total]
TOT_M	[Population, male, total]

2.1.3 USUALLY RESIDENTIAL POPULATION BY SEX AND THREE AGE GROUPS

Refers to aggregated integer value over residential population divided by sex and three age groups per grid cell.

Population	
F_00_14	[Population, female, age 00-14]
F_15_64	[Population, female, age 15-64]
F_65_	[Population, female, age 65+]
M_00_14	[Population, male, age 00-14]
M_15_64	[Population, male, age 15-64]
M_65_	[Population, male, age 65+]
