
GEOSTAT 3 project – Minutes from Coordination meeting

Date: November 20, 2018

Venue: Web meeting

Participants

Anna Sławińska, Statistics Poland
Ana Santos, Statistics Portugal
Erik Engelién, Statistics Norway
Ingrid Kaminger, Statistics Austria
Jerker Moström, Statistics Sweden
Karin Hedeklint, Statistics Sweden
Magdalena Żero, Statistics Poland
Marianne Dysterud, Statistics Norway
Marina Backer Skaar, EFGS secretary
Pieter Bresters, Statistics Netherlands
Rina Tammisto, Statistics Finland
Ülle Valgma, Statistics Estonia
Vilni Verner Holst Bloch, Statistics Norway

Agenda

1. WP-3:
 - a. New structure on EFGS website
 - b. CROS portal
2. WP-1: Annex with good practise examples
3. WP-2:
 - a. Status of SDG report
 - b. Status of TJS tests
4. A.O.B.

1 WP-3

a. New structure on EFGS website

Anna has tested the suggested new structure for parts of the website, that was discussed at the project meeting in Helsinki. She presented a draft to us. The project agreed that it looked just according to our requirements. Anna will therefore prepare the rest of the pages now.

The new structure needs to be supplemented with an introduction, that Marianne and Jerker will provide. Statistics Norway will also provide a template for the presentation of the testing results. When Anna has access to the template she will start populate the new pages.

We discussed if it is possible to prepare something similar for the good practise examples annexed to the main project report. That would probably need a separate entrance for the GSGF framework. Ideally it could be ready by the end of this project. In shortage of time the work could be done during 2019, within Statistics Poland's task to maintain the website. It depends on budget and available time. Therefore, the structure for the SDG indicators is prioritized.

b. CROS portal

Anna has updated the information for the GEOSTAT 3 project. To update the GEOSTAT 2 information, she needs a special login access, that Eurostat must provide her with. Ekkehard can probably help Anna with that.

2 WP-1: Annex with good practise examples

We went through the Excel sheet that consists of a list with existing and suggested good practise examples. We discussed all suggestions that have not yet been materialized as texts. In the column "Prio." we marked if they should be written by any project member (code "1") or if it by any reason was not prioritized any longer (code "0").

Some examples fits into several of the principles. Then they could be placed in the section where it will fit the best, with interlinks to other sections. The author of the text will indicate which principles that are relevant.

Last by December 5, Jerker needs to know what cases to refer to in the main report. That concerns the cases in the Excel sheet. Additional cases may have a later deadline.

Each case should have some sort of contact information, preferably an e-mail address.

3 WP-2

a. Status of SDG report

Marianne is working with the report, by taking into account the comments from the Helsinki meeting.

b. Status of TJS tests

The test is completed and the report has been sent to Jerker. It will be annexed to the main report.

4 A.O.B.

- Janusz at Statistics Poland will present the GEOSTAT 3 project at the global meeting in Beijing that is taking place soon.
- Jerker will provide a draft of the main report to the global working group of GSGF.
- Marja at Statistics Finland, has written a report of the 2018 EFGS conference.
- Our next web meeting is December 12, at 10:00 CET. Until then, we will be provided by several drafts, to study and comment:
 - Main report of WP-1
 - WP-2 report
 - Website structure, for SDG indicators
